

CLIMATE ZONE TRAVEL FLYER

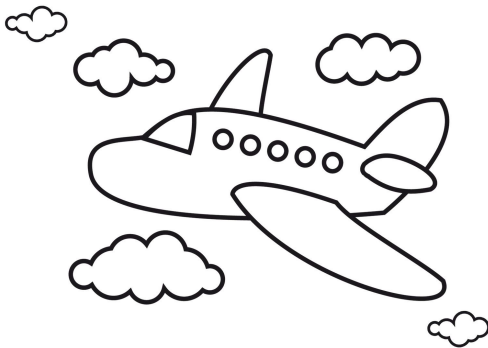

What are climate zones?

Earth is divided into climate zones based on an area's temperature and precipitation. Take a look at the map below. What do you think the differences between each climate zone are? What climate zone do you live in? Have you ever traveled to a different climate zone?

Procedure:

Research a climate zone and pick two (2) cities in each zone to go into further detail. Include the following:

1. Average temperature
2. Average Rainfall
3. What to do
4. What to pack (clothing wise)
5. Reasons to visit

Results:

Be Creative!

Create a flier on Microsoft Word and send it to me.

Create a poster and send a picture (save it of course and bring it to class when school resumes).
